## **Modeling Addition and Subtraction** with a Number Line

1. \_\_\_\_\_ the number line.

- 2. Draw a \_\_\_\_\_ segment above the number line for the \_\_\_\_\_.
- 3. If the operation is \_\_\_\_\_\_, draw an arrow to the \_\_\_\_\_; if the operation is \_\_\_\_\_, draw an arrow to the \_\_\_\_\_.
- 4. The arrow should be the \_\_\_\_\_ of the \_\_\_\_\_, and \_\_\_\_\_.
- 5. Draw a \_\_\_\_\_ segment above the number line for the \_\_\_\_\_.
- 6. Complete the \_\_\_\_\_.

examples:

-10 + 3 =

$$8 + -2 =$$

$$-5 - 10 =$$
