

****MUST show work for ALL problems****

1. a. volume

b. 400 m^3 of concrete

$$\textcircled{1} \quad 5 \bullet 4 \bullet 5 = 100$$

$$\textcircled{2} \quad 10 \bullet 5 \bullet 3 = 300$$

$$V = 100 + 300 = 400 \text{ m}^3 \text{ of concrete}$$

2. a. surface area

b. 288 ft^2 of paint

$$4 \text{ top triangles: } 4\left(\frac{6 \bullet 9}{2}\right) = 108$$

$$4 \text{ bottom rectangles: } 4(5 \bullet 9) = 180$$

$$SA = 108 + 180 = 288 \text{ ft}^2 \text{ of paint}$$
